

Weil McLain Boiler Systems

Northland Heating offers boiler installations by Weil-McLain for residences, schools, businesses and many other applications. Weil-McLain gas boilers for direct exhaust offer water net ratings of 37,000 to 169,00 BTU/hour. We install boilers quickly and efficiently, and Weil-McLain offers some of the best boilers on the market. We carry the Weil-McLain CGI Series 2 boilers which are a perfect option for home heating needs.

Weil-McLain boilers are made of durable cast iron for strength, efficiency and long lives. These boilers offer high-grade stainless steel burners that offer the best in air flow technology. Weil-McLain boilers are designed so that the burner ports provide exceptional stability with natural or propane gas for quieter operation and improved combustion. These boilers offer flexibility in venting to fit exactly what your home or business needs. We also offer additional equipment to optimize your boiler investment.

Our trained team can quickly and efficiently install your new boiler to take the headaches out of boiler installation.
